

## UPDATE FROM LMC LIAISON 23/05/22

- As we are heading into the winter months it is advised that if you are planning to get your Flu vaccine then doing it sooner would be better. With Covid still around the DHB is expecting higher numbers of people unwell with Covid or the Flu. The contract from the MoH for LMC's to provide core care has been extended for the winter months. If you are able to provide any time to helping on shift then please contact the ACMM. There is paperwork that you will need from Charlotte Evers and this will go to MMPO and you will be paid regardless of who you provider is.
- If you are planning on putting your name forward for women on the festive list then could you please contact the MRC midwife. This would be women you can provide care for in the postnatal period and then they will have a core midwife to provide them with labour and birth cares.
- I have been contacted by the dietician for the diabetes clinic and she has put together some information that will be useful for LMC's who have women that have been diagnosed with GDM. [Dietitian Update](#)
